### Government of the Argentine Nation Five Year 6% Treasury Gold Bonds

Deted May 15, 1915

Interest payable November 15 and May 15 Principal and interest payable in New York at The National City Bank of New York in U. S. gold dollars of the present standard of weight and fineness.

These Treasury Bonds are issued under authority of Law Number 9468, dated January 2, 1914, and Law Number 9648, dated February 9, 1915, which authorize the Executive Power to issue a total amount of 80,000,000 Argentine gold pesos (equivalent to \$77,760,000 United States gold or \$16,000,000 sterling) for the purpose of furnishing means for the extension of the Sanitary Works and water supply of the Federal Capital. The immediate issue consists of the \$25,000,000 now offered in the United States of America and £5,000,000 offered in the United Kingdom of Great Britain. Both the sterling and dollar bonds are of substantially similar tenor and content.

After May 15, 1917, sterling and dollar bonds will be interchangeable between London and New York at the fixed rate of \$4.86 per pound sterling the expense of any new stamps which may be required to be borne by the holder.

These Five Year 6% Treasury Gold Bonds are the direct general obligation of the Argentine Government, whose faith and credit are pledged for the prompt payment of the principal and semi-annual interest as they fall due. The text of each bond is to embody the following three clauses:

"For the purpose of furnishing means for the eventual replacement of the present short term Treasury Bonds by the issue of long term bonds, the Executive Power of the Nation shall procure such amendment of Laws Numbers 8889 and 9468 as will permit the Government to assume responsibility of and endorse with its guaranty the bonds or obligations which the Board of Sanitary Works is authorized to issue in accordance with those laws. When the amendment has been obtained and the issue made, the proceeds thereof will be applied to the redemption of the present issue.

"Until the entire loan, of which this bond forms a part, is cancelled, the Government of the Argentine Nation will not agree to more favorable conditions as regards security for any other loan whatsoever without securing in like manner the principal and instalments of interest of each and every bond of this loan. Loans are excepted which may be raised for industrial purposes, such as railroads or petroleum, and for which the industries themselves may be encumbered.

"When the amendment of Laws Numbers 8889 and 9468 shall have been accomplished and the attendant issue of bonds or obligations shall have been made, the Executive Power will retain in his control, as security for this loan until its complete cancellation, an amount in money or of such bonds or obligations equal to the amount of the present loan."

From the proceeds of the present loan there will be retained by the Bankers, funds sufficient to pay off \$5,000,000 Series "A" 6% Gold Notes maturing December 15, 1915; £5,000,000 of short term notes maturing in London, September 2, and £3,000,000 maturing December 15, 1915. The balance will constitute free money available for further construction expenditures upon the Sanitary Works of Buenos Aires.

Additional bonds are reserved under the authorization of the above laws to refund the \$5,000,000 Series "B" and \$5,000,000 Series "C" Notes maturing December 15, 1916, and December 15, 1917, respectively.

A circular giving additional data may be had upon request

We offer these Bonds, subject to prior sale and change in price, at

99 and interest

Interim certificates will be issued on or about May 15, pending delivery of definitive bonds.
